- I Took part in different projects with different IT Businesses as a . Net Developer, Android Native Developer and Full Stack Web Developer. More details in the "Project" section of the resume.

Full Stack Software Engineer
Fortech S.R.L
📅 12/2021 - Ongoing 📍 Rimini, Italy
Software House

- I'm currently part of the NonOil Manager team project, as a Full stack web developer / DevOps. More details in the "Project" section of the resume.

PROJECTS

Add-ons Developing for NTSBusiness by NTS Informatica
📅 02/2020 - 12/2021 📍 Cesena, Italy
.NET VB6 Developer

- I sometimes develop custom Add-ons for an Italian ERP called NTSBusiness and developed by NTSInformatica. Visual Basic is the language I develop with, and SQL Server for managing and storage Data.

ERP Sap Business One Add-ons Developing
📅 01/2018 - 02/2020 📍 Faenza, Italy
.NET C# Developer, Body rental, VM Sistemi SPA

- We were a team of 15 people, and we developed several add-ons for Sap Business One, a small/medium business ERP, by using its SDK, .NET libraries for Desktop development, Entity framework for the relational mapping and SQL Server for the Database Management System; The versioning control was managed by TFVC (Team foundation versioning control), and Azure DevOps was our Agile platform (SCRUM).

Florim Ceramiche B2B Refactory / Design (Front-End)
📅 03/2020 - 07/2020 📍 Cesena, Italy
Front End developing with Vue.js Framework

- This was my first experience as a front end developer. We redesigned a B2B with Vue.js Framework, together with another Team, which was part of another software house: Peer Network S.R.L,based in Ravenna.

SUMMARY

I'm a Software Developer that worked on different projects and technologies during his professional career, making also contact with lots of different IT Businesses and Software house Teams, so I managed to use to work with other people from the beginning. Apart from technical skills, I've always tried to put myself as the person and the human being that I am in the project, trying to develop the best way possible internal and external Team relationships and never taking any kind of thing for granted by empathizing, understanding and living everyone different reality within the team. I'll give all myself to improve and grow my professional figure and my personal also, giving all I've got to reach the milestones and objectives that the Company in which I will eventually be included sets itself. In the free time, I like to play the piano, also singing some songs sometimes, reading classics, travel (when it's possible) and I also like to invest in the stock market (and studying its behaviour).

MY TIME

- Ⓐ Playing Piano
- Ⓑ Reading (Classics / Self Growth)
- Ⓒ Work
- Ⓓ Relaxing
- Ⓔ Exercise
- Ⓕ Personal projects

PROJECTS

PassDelivery Application by Passepartout S.p.a.
📅 07/2020 - 09/2020   📍 Cesena, Italy
Front-end and Back-end developing with Vue.js / .NET Core
- We built from scratch a web application for deliveries for Passepartout S.P.A, an IT business located in San Marino. We developed the Front-end part with Vue.js, and the back end part with .NET Core. Furthermore, we managed and storage data with MongoDB, and we used the Atlassian Agile Instrument's pool for managing work (Jira/Confluence).

HT16000 Android Application by HTItalia
📅 10/2020 - 12/2021   📍 Cesena, Italy
Android Native Development with Kotlin
- We built from scratch an Android Application with Kotlin that had to interface itself with an Instrument that makes measurements and recordings on Electronic and Electrotechnical circuits, Power plants and Solar panel; It generates waveforms, harmonics and interharmonics, and it's highly customizable with wide settings possibilities. We used Jira and Trello as our main Agile platforms, and Git for versioning control.

FriTravelApp Application by Horsa S.P.A.
📅 03/2021 - 12/2021   📍 Cesena / Genova, Italy
Full stack developing with Angular and .NET Core
- I was, till December 2021, part of the FriTravelApp Team by Horsa S.P.A, as a Full Stack developer. The Web application is a booking tool which several Travel Businesses in Italy exploit and let them clients use (principally corporate) for creating and managing trips with Flights, cars, Hotels and Trains. The application itself it's highly customizable and parametrizable; The front end part is built in Angular (11) and the back end part with .NET Core, with Asp net boilerplate as a wrapping framework that has several built-in packages, and it's Domain Driven Design oriented. We use Azure DevOps as our Agile platform (SCRUM), Git for versioning control and MongoDB-MSSQL-Redis for data storage.

NonOil Manager
📅 12/2021 - Ongoing   📍 Rimini
Full stack developer - Angular and .NET Core
- I'm currently part of the NonOil Manager team inside Fortech S.R.L. IT Business Company. NonOil Manager is a Gas Station "warehouse" portal where different Gas stations inside the Italian and Spanish territory can check the current status of their warehouse, what they have / don't have on stock, and every transaction and income (or outcome) that is not oil based, we can say. The biggest customer is, nowadays, ENI S.p.a. . The front end part is built with Angular (13) and the back end part with .NET Core. Every procedure is controlled with RabbitMQ Queues, with the microservices pattern. We use MongoDB and MSSQL for data storing, so both NOSQL - SQL. I also manage test and production services environments, with Linux commands (rarely) for checking services status; Deploy pipelines and scheduling. We use Teamwork as agile platform and Teamcity for deploy managing.

SKILLS

Vue.js   Vuex   Angular   CI/CD

.NET Core   REST API   Android

Kotlin   MongoDB   T-SQL

Microsoft SQL Server   Git
